

PINNACLE STUDIO™ MediaSuite

The Total Video Experience

Pinnacle Systems the leader in Digital Video

Everything for Unlimited Multimedia Creativity, Enhancement, and CD/DVD Burning

A full suite of complementary tools together with Studio Plus, the most advanced version of Pinnacle's award-winning video editing application

Enhanced Video, Photo and Audio Creativity and Control

Studio MediaSuite brings together the ultimate collection of software for working with multimedia files at every stage of the process, including pre- and post-production. Based on Pinnacle's award-winning Studio Plus, this suite provides much more than traditional burning software: it gives you the power to extensively edit, enrich, enhance and burn multimedia files of all kinds – including video, music, and data – to CD and DVD, and then label, share, and archive them.

Powerful Video Editing

Studio MediaSuite gives you full command over your video files with the advanced technology and proven, unique user interface and workflow of Pinnacle's highly acclaimed Studio Plus. This powerful video software allows you to transfer videos from tapes to your computer, edit them, add titles, music, narration, and special effects, and then burn them on CDs or DVDs. Multiple video and audio layer support lets you add a high degree of sophistication to your Studio projects with special effects, such as Picture-in-Picture and Chroma Key. Automatic color correction and noise removal make it easy to perfect your new projects and even clean up old taped videos. What's more, you can track your progress with real-time, full-screen previews throughout the editing process.

High-quality Photo and Audio Management

Optimize your digital photos with included Corel® Photobook™ software. Whether they're from your digital camera, on a disc, or scanned, you can retouch, organize, and share your digital images in TIFF, JPEG, PSD or FlashPix® formats and create personalized screen savers and photo albums. And with a wide array of advanced Studio Plus tools at your fingertips, you can create professional-quality, animated slide shows that will amaze your friends.

Steinberg® WaveLab Lite gives you extensive digital audio editing and mastering capabilities for WAV, MP3, AIFF, AU, and RAW file formats. Refine your audio files for your listening enjoyment, or create awesome soundtracks and narration for your Studio Plus home movies and slide shows. Import WMA and MP3 files, record audio or rip from CD. Trim and edit audio files with Cut/Copy/Paste/Insert tools. Easily create fade ins, fade outs, and cross fades. Repair and restore damaged audio files, and apply powerful audio processing tools including Normalize, Dynamics, and Equalization.

Complete Set of Multimedia Tools

Pinnacle's multimedia tools are the icing on the MediaSuite cake. For fast archiving of your videos, Pinnacle InstantDVD Recorder allows you to transfer videos straight from your tape to a DVD. Pinnacle MediaManager lets you manage and organize all the media files on your PC, import CD music and video tapes, and burn any file to CD or DVD. Use Pinnacle InstantCopy to duplicate any non-copy protected CDs or DVDs. When you're ready to sit back and watch your masterpiece, Pinnacle InstantCinema lets you enjoy your movies right on your computer screen.

Extra Bonus!

A large, 5-foot by 6-foot green sheet backdrop lets you create impressive Chroma Key ("weatherman") special effects, superimposing the foreground of one video clip onto the background of another, just like you see on TV.
